# ChronoScan Capture Desktop

Chronoscan Capture Desktop

Chronoscan Capture Desktop is the ultimate suite for scanning, OCR and PDF data capture.

Boasting a wealth of features Chronoscan can provide everything from simple capture applications to the most complex and demanding line item data report dismounts.

Flexibility is the keyword with Chronoscan in every respect, from input, output and data extraction to direct database integration, providing live bi-directional data exchange and validation.

Chronoscan supports direct scanning as well multiple document import streams and automated import queues via the built in hotfolder mechanism, ideal for multifunction devices and email integration.

When it comes to exporting data Chronoscan supports multiple file and data output formats, built in integrations such as Microsoft SharePoint, CMIS and GoogleDocs as well as direct database integration. In addition you can mix and match these too!

Need even more flexibility? No problem, utilise Chronoscans built in Visual Basic Scripting support to mould the product to your exacting requirements.

What are you waiting for? Visit **www.chronoscan.org** to download and test drive the product now!

Features

Advanced Document Scanning

With Chronoscan you can scan and organise your documents in minutes, not hours.

Zonal OCR

Allows you to extract localised areas on your documents indicating data type and custom ocr parameters.

IntelliTag Auto Templating

Use IntelliTags to automatically locate and extract data from your documents without the need to manually zone areas.

Complex Report Dismount

With its very unique features Chronoscan is able to visually dismount and structure complex documents.

Barcode Capabilities

Instantly read 1D/2D barcodes from your documents.

HotFolders

Automatically execute your jobs using hotfolders without command line or scripting.

OCR Triggers

Activate actions such as document splits, ocr zone anchoring and document type changes when specific text is located.

Flexible Document Separation

Multiple multipage document separation strategies, IDR, OCR triggers, patchode, barcode, visual split...

PDF Data Extraction & Bookmarking

Automate repetitive tasks like PDF data extraction, renaming and bookmarking.

Input/Output

Input documents from multiple streams and sources and export data and documents simultaneously to systems CMIS M-Files & SharePoint

PDF to XML/CSV Conversion

Chronoscan can convert documents to XML/CSV files without any user intervention. Optimise business processes by automating any kind of workflow.

Nuance OCR Plugin

The worlds most accurate and robust OCR.

Database Integration

Directly validate and perform bi-directional data exchange with any ODBC database.

Intelligent Document Recognition

Chronoscan uses state of the art computer vision algorithms to detect, learn and classify both pages and documents.
