

ChronoScan Enterprise

Chronoscan Enterprise

Chronoscan Enterprise is the ultimate suite for scanning, OCR and PDF data capture.

Boasting a wealth of features Chronoscan can provide everything from simple capture applications to the most complex and demanding line item data report dismounts.

Flexibility is the keyword with Chronoscan in every respect, from input, output and data extraction to direct database integration, providing live bi-directional data exchange and validation.

Chronoscan supports direct scanning as well multiple document import streams and automated import queues via the built in hotfolder mechanism, ideal for multifunction devices and email integration.

The screenshot displays the Chronoscan Enterprise software interface. The main window shows an invoice for 'Bradford Wire & Mfg Co' with invoice number 58954. The invoice details include the company name, address, phone, and fax. Below this, there is a table with columns for 'Ship Rep.', 'P.O. Number', 'Ship Date', 'Ship Via', 'FOB', and 'Terms'. The main part of the interface is a table with columns for 'Quantity', 'Description', 'Unit Price', and 'Total'. The table contains four rows of data. At the bottom, there is a summary table with columns for 'Id', 'Details Line', 'Line Total', and 'Balance'.

Ship Rep.	P.O. Number	Ship Date	Ship Via	FOB	Terms
Amler	555.8954	12/21/2011	AIR	AP-90%	CASH

Quantity	Description	Unit Price	Total
2	Investigate movement, strip down & replace rear pin	22.00	44.00
4	Carry out part Strip down hammer head assembly and leveling oval pins	24.00	96.00
4	Measure up bearings & shaft	34.50	138.00
1	Re-build head rd	27.00	27.00

Id	Details Line	Line Total	Balance
0001	Investigate movement, strip...	54.00	✓ 258.00
0002	Carry out part Strip down h...	96.00	✓ 162.00
0003	Measure up bearings & shaft	135.00	✓ -27.00
0004	Re-build head rd	27.00	✓ 0.00

When it comes to exporting data Chronoscan supports multiple file and data output formats, built in integrations such as Microsoft SharePoint, CMIS, M-Files and GoogleDocs as well as direct database integration. In addition you can mix and match these too!

Need even more flexibility? No problem, utilise Chronoscan's built in Visual Basic Scripting support to mould the product to your exacting requirements.

What are you waiting for? Visit www.chronoscan.org to download and test drive the product now!

ChronoScan Enterprise

Overview

ChronoScan Enterprise builds on the success of our popular fully featured desktop application by providing true client/server architecture and the ability to use the application via any popular web browser by multiple users.

With ChronoScan Enterprise we now have the capability to scale the system to huge document volumes distributed over multiple load balanced servers to 1000's of users.

In addition to all the great features you know from our desktop application discover some of the new features in ChronoScan Enterprise.

Features

Advanced Document Scanning

With Chronoscan you can scan and organise your documents in minutes, not hours.

Zonal OCR

Allows you to extract localised areas on your documents indicating data type and custom ocr parameters.

IntelliTag Auto Templating

Use IntelliTags to automatically locate and extract data from your documents without the need to manually zone areas.

Complex Report Dismount

With its very unique features Chronoscan is able to visually dismount and structure complex documents.

Barcode Capabilities

Instantly read 1D/2D barcodes from your documents.

HotFolders

Automatically execute your jobs using hotfolders without command line or scripting.

OCR Triggers

Activate actions such as document splits, ocr zone anchoring and document type changes when specific text is located.

Flexible Document Separation

Multiple multipage document separation strategies, IDR, OCR triggers, patchode, barcode, visual split.

PDF Data Extraction & Bookmarking

Automate repetitive tasks like PDF data extraction, renaming and bookmarking.

Input/Output

Input documents from multiple streams and sources and export data and documents simultaneously to systems CMIS M-Files & SharePoint

PDF to XML/CSV Conversion

Chronoscan can convert documents to XML/CSV files without any user intervention. Optimise business processes by automating any kind of workflow.

Nuance OCR Plugin

The worlds most accurate and robust OCR.

Database Integration

Directly validate and perform bi-directional data exchange with any ODBC database.

Intelligent Document Recognition

Chronoscan uses state of the art computer vision algorithms to detect, learn and classify both pages and documents.

Features

Client/Server Architecture

Centralise processing power and resources whilst reducing IT administration.

Thin Client Interface

Allows easy access to powerful data capture and extraction without the need to deploy desktop applications.

Multiuser Support

Provides simultaneous support for multiple users across multiple geographic territories.

Multilingual GUI

Switch languages on-the-fly for international users and the ability to easily translate.

User Role Support

Full control for user capabilities and roles within the system.

Workflow

Automate processes and allocate users to specific elements of the workflow

Multiple Servers

Distribute multiple services and processes across individual servers for increased redundancy and scalability.

Server Load Balancing

Distribute your jobs to cope with peak time workloads or large capture projects over multiple servers

Notifications

Keep everybody informed of system processes using multiple automated notifications.

IMAP Client

Provides functionality for users or even your own clients to submit documents via email.

Logging And User Statistics

Log actions such as user edit and process times for statistical analysis or billing purposes and monitor actions within the system.

High Speed Browser Editing

Fully featured high speed viewing, editing and validation tools built right into the browser.

Cloud Scanning Client

Allow your users and clients to scan directly into ChronoScan without the need to purchase additional software.

Security

Control document and data access and restrict user functionality using powerful user role controls.
